Setting Procedure

This document helps you to integrate Cacoo Enterprise and Cacoo (Online service, <https://cacoo.com/>) to import the diagrams you have created online. First, please register Cacoo Enterprise as an application. Then the registration information will be used as a setup file for Cacoo Enterprise.

Note: About the account used for the set up

To avoid losing sign-in information in case of the resigning or transferring of the person in charge, we recommend you to use a designated account for registering enterprise as an application.

Note: About [CACOO_URL]

When the settings value shows [CACOO_URL], please replace it with your Cacoo Enterprise's URL.

Example of [CACOO_URL] :

<http://cacoo.example.com/>

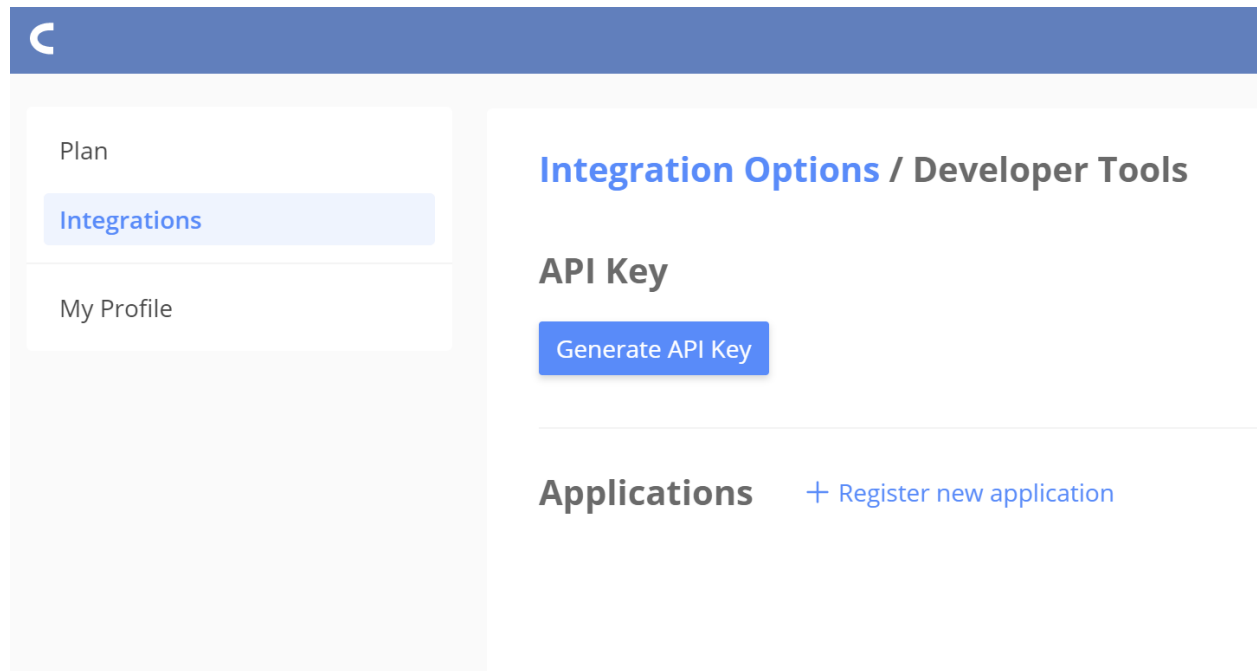

<https://cacoo.example.com:8080/cacoo/>

Register Cacoo Enterprise as an application

On a Web browser, sign in to Cacoo (<https://cacoo.com>) with the designated account for set up. Please access the URL below:

<https://cacoo.com/app/p/settings/integrations/developer-tools>

Please click “Register new application” in the page. (If you already have registered applications, the list is shown here.)

The application's settings page will be shown. Please put the following.

Application name	Cacoo Enerprise
Description	(blank)
Application's URL	[CACOO_URL]
Organization	Your company name
Application type	Choose “Browser”
Callback URL	[CACOO_URL]signin/cacoocom/callback
Default Access Type	Choose “Read-only”
Icon	(optional)

Click {Save} after the set up.

Cacoo Enterprise

Update ⓘ

Description

Application URL

http://cacoo.example.com/

Organization

Nulab Inc.

Application Type

☐ Client ☒ Browser

Callback URL

http://cacoo.example.com/signin/cacoocom/callback

Default Access Type

☐ Read & Write ☒ Read-only

(Once saved, this setting can not be changed.)

Save

Consumer Key/Secret will be generated. These 2 strings will be used later. Please keep them handy.

The image shows a modal window for configuring application settings. It contains several fields with labels and values, and a blue 'Edit' button at the bottom right.

Field	Value
Application URL	http://cacoo.example.com/
Organization	Nulab Inc.
Application Type	Browser
Callback URL	-
Consumer Key	IQpUI1npss5VAf3xwVaMDq
Consumer Secret	qYbOQltLKRzrJnB0If6ZU2I034tLSHZNe\
Default Access Type	Read-only

That's all for the settings on <https://cacoo.com> . We will move on to the Enterprise.

Update the Cacoo Enterprise's settings

Please update the .env file for Cacoo's setting with the Consumer Key/Secret which you kept before.

- CACOO_COM_CONSUMER_KEY
- CACOO_COM_CONSUMER_SECRET

Note: About updating the settings file

To update the settings file, Cacoo needs to be restarted.

Everything is set.

Importing diagrams

Each user can import diagrams in the Cacoo (Online service, <https://cacoo.com/>) . Go to Settings > Import to import diagrams.

To import a diagram, please specify the URL of the target diagram then click the [Import] button.

The screenshot shows the Cacoo Enterprise web interface. On the left is a sidebar menu with options: Account, Picture, Password, Email, Applications, API Key, Developers, and Import (which is highlighted). The main content area is titled 'Import diagrams from your Cacoo.com account'. It features a text input field for 'Diagram's URL' containing the example 'e.g. https://cacoo.com/diagrams/abcdef0123456789'. Below the input field is a note: 'You will log in to your Cacoo.com account automatically to import the diagram.' At the bottom of this section is a blue 'Import' button. In the top right corner, there is a user profile dropdown for 'user1@example.com' with 'Settings' and 'Logout' options.
